

BAITA

The compact and complete milk sales point

Baita is a complete sales point for the sale of milk, ready to be installed and operated. Thanks to the bearing structure in iron, it can be lifted and transported and it is equipped with dispensers. It is made of varnished wood and it is of reduced sizes in order to be placed in areas of the city or town that are fairly small in terms of space. It has access doors at the front and at the back.
